Geographical Information System (GIS) Managed Services

Help maintain your organization's public safety GIS data and maps with dedicated, full-service professional support

Many public safety organizations have limited access to shared GIS resources who answer to multiple departments — or no GIS resource at all. Any available GIS resources in turn may not have the experience or bandwidth to maintain critical location data appropriately. Officer safety and incident response times get put in jeopardy when GIS data, which underpins all public safety operations from incident response to reporting, becomes outdated.

With GIS Managed Services from Motorola Solutions, experienced professionals solely dedicated to public safety maintain, update and publish the GIS data that supports your public safety maps. Choose the right level of support to keep GIS data updated while meeting your budget.

Knowledgeable GIS personnel

Finding a GIS professional that understands public safety, as well as your specific software, can be a huge hurdle. With GIS Managed Services, our team members are specialized in both areas. They also have a clear understanding of how your public safety software integrates with Esri for optimal functionality.

Accelerated maintenance and troubleshooting

Supplement your organization's maintenance processes with regularly-scheduled reviews and tasks performed by GIS professionals. Rely on experts to assist at the level you need — from processing and publishing data, to more complex data management like creating common places or zones, to full support through complete management of the public safety data for your GIS system.

Affordable services tailored to your agency's needs

With GIS professionals in high demand, you may not feel like you have the budget to hire someone to address your GIS needs. Don't wait to prioritize the maintenance of your organization's maps. Connect with Motorola Solutions experts to examine your organization's unique processes, capabilities, and GIS maintenance needs. Then, purchase only the tier of services needed to meet your goals and desired outcomes.

MOTOROLA *SOLUTIONS*

Leverage the right level of service to support your organization's operations

Streamline maintenance operations with support from experts in GIS and public safety.

Standard

Maintain accurate location data with:

- processing and publishing support from GIS experts.

Plus

Streamline your location data maintenance processes with:

- data management, including hosting or management of Common Places, Points of Interest, or jurisdictional zones
- the processing and publishing support available at the Standard level

Premium

Rely on GIS experts for the hosting and management of your CAD-specific GIS data, including:

- web app hosting
- address maintenance
- the data management included in the Plus tier
- the processing and publishing support available at the Plus and Standard tier

Managed Services Bundle

Leverage the support of a dedicated GIS services expert as a single point of contact for any location data-related maintenance tasks. With a full calendar year to use purchased hours, the managed services bundle provides flexibility with how and when you access support.
