V200 Body Camera for public safety

Integrity captured

MOTOROLA SOLUTIONS

Integrity captured in every response

Across industries and communities, public safety professionals face rising risks. Whether it's paramedics delivering urgent care, detectives uncovering critical evidence, or incident commanders making split-second decisions—each encounters high-pressure, high-stakes that demand both courage and clarity.

In these situations, a body camera is more than just a recording device—it's a trusted ally. It can help calm tense encounters, capture every detail with accuracy, and strengthen real-time coordination with teams in the field, control rooms, or command centers.

The V200 is built with simplicity at its core. One button starts recording, another triggers escalation—no complex menus, no distractions—so professionals can stay focused on the task at hand. When an escalation is activated, a commander or supervisor can launch GoLive Audio and livestream video instantly, connecting directly with the responder to provide guidance, coordinate resources, or call in support.

A glanceable top display keeps critical status—battery life, alerts, connectivity—clear and accessible, so you are never left guessing. These intuitive features help users* feel supported, protected, and confident, even in the most unpredictable situations.

*For frontline responders in more demanding environments, a more rugged option like the VB400 or V500 body camera may be better suited.

Stay supported. Stay connected.

Through VideoManager and a secure Wi-Fi connection, staff can activate a live video stream for a real-time, first-person view of the scene—delivering immediate situational awareness as events unfold. With GoLive audio, they can also engage in instant two-way communication, allowing teams to provide real-time guidance when every second counts.

GoLive audio

Deliver real-time guidance via Wi-Fi when every second matters, or communicate directly with those involved while calling for backup to quickly defuse conflict and keep teams safe.

Livestream video

View live incident video via Wi-Fi for a first-hand perspective—whether assessing risks and resource needs or supporting fast, informed decisions in the field.

Intuitive control. Confidence at your fingertips.

The V200 body camera is engineered for dynamic environments where clarity and control matter most. A large textured front button lets you start recording while keeping your eyes up — while a distinct side button instantly sends escalation alerts. A glanceable display shows battery status, Wi-Fi connectivity, escalation and streaming status, so you're never left guessing.

Effortless control

Purpose-built buttons provide precise control for volume, escalation, and recording functions.

Intuitive top display

Quickly verify battery status, Wi-Fi connectivity, escalation and streaming status.

Shift with ease. From start to finish.

Streamline body camera allocation, charging, and video offloading with a simple, efficient process. A quick RFID badge swipe assigns a fully charged camera at the start of a shift, while docking at the end enables automatic video offload and recharge—no additional training required.

Smart Dock

Combine charging and video offloading into one to maximise space and minimise complexity.

RFID Touch Assign

Checkout a charged body camera with just a swipe of your badge, keeping you focused on the task at hand—without distraction.

Start every shift with comfort and control

Choose from a range of mounting accessories for a secure and comfortable fit throughout the day, helping your employees stay focused. And with fully customisable labels, personalise the camera to match uniforms, incorporating colors, fonts, text, and logos to align seamlessly with your agency's brand guidelines.

Flexible mounting options

Ensure a comfortable and secure fit throughout the day, empowering users to feel at ease and perform at their best.

Customizable labels

Personalize your body cameras with a full label design to match your uniforms for a consistent brand image.

VideoManager

Effortless management. Total connection.

Trusted across our broader video portfolio, VideoManager brings a seamless, familiar experience to managing the V200. Administer devices, store and share footage securely, and integrate live body and fixed camera streams into any ONVIF-compatible video management system—scaling effortlessly to your organisation's needs.

Easy to deploy, even easier to use

Get up and running quickly with a plug-and-play model; choose an on-premises installation or a cloud deployment managed by Motorola Solutions.

Personalise the experience

Fit your body cameras' behaviour to your workers' needs, and only enable the functionality relevant to your team.

Make your video work for you

However you want to use your footage, we have all the tools you need to manage it – including redaction and sharing – in one convenient user interface.
