

# M500-as-a-Service

## Transparency shouldn't come at a high price.

As the requirement for law enforcement video systems continues to grow, the obstacles to acquisition remain the same. Raising funding and securing grants is difficult and time-consuming. Data storage and system maintenance costs are hard to predict. And video technology continues to mature, making a big investment potentially risky.

Motorola Solutions helps you overcome these obstacles: you can deploy a new camera system and start using it immediately under a simple 5-year pay-as-you-go program. Everything you need is provided, including your camera system, required accessories, management software, video storage, service and support. And if you already have content in an in-car video management system, we can work with you to migrate your video material to the new platform.
