

THE FUTURE OF SYSTEM MANAGEMENT

CIRRUSCENTRAL MANAGEMENT

CIRRUS CENTRAL

THE FUTURE OF SYSTEM MANAGEMENT

Everyday and night, the radio on their hip or in their vehicle serves as a lifeline for those who respond to the call for help and run into a burning building.

They expect the call to go through at every push of a button. And you need the right tool to know that your radio system is up to the task, one that will warn you before users are impacted and help you restore normal operation as quickly as possible. You need CirrusCentral Management.

CirrusCentral Management is a modern, cloud-based system management suite built for ASTRO radio systems. It can give you insights into your system's performance with detailed statistics and trends to help identify potential issues before they become a problem. The easy to use intuitive interface helps streamline remediation of alarms and events. And the best part, you can securely access your radio system from anywhere, on any device, when it matters most.

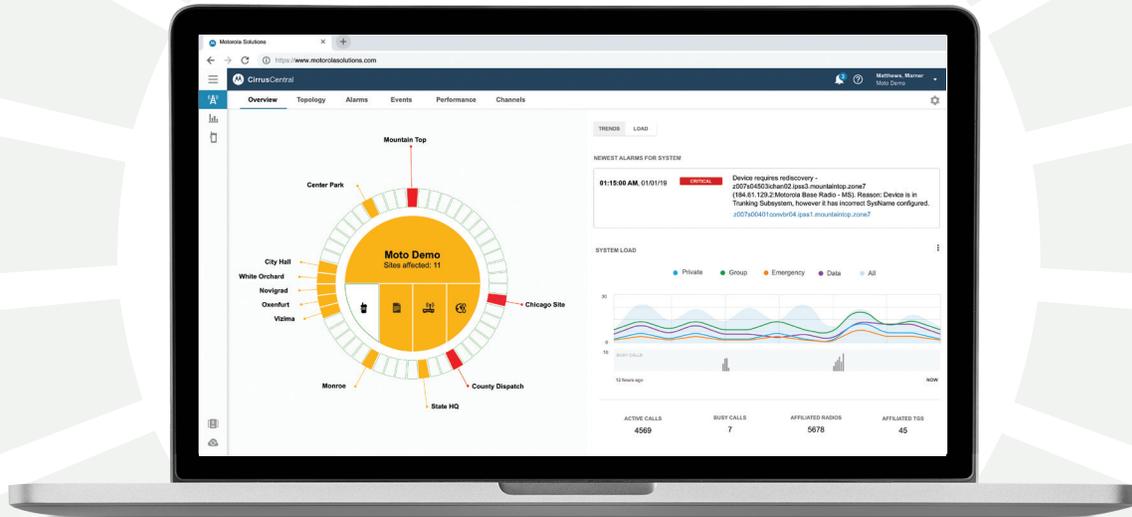

YOU NEED THE RIGHT TOOL TO KNOW THAT YOUR RADIO SYSTEM IS UP TO THE TASK, ONE THAT WILL WARN YOU BEFORE USERS ARE IMPACTED AND HELP YOU RESTORE NORMAL OPERATION AS QUICKLY AS POSSIBLE.

BETTER INSIGHTS

FOR MORE INFORMED DECISION MAKING

SYSTEM OVERVIEW

From a single pane of glass dashboard to detailed trends and utilization, get the right information you need, when you need it for more informed decision making. Use either the light or dark modes for optimal viewing based on your environment.

SITE LOAD

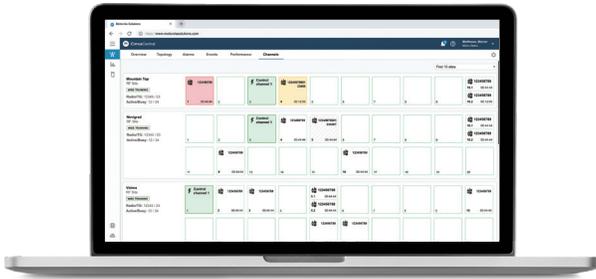

See real-time site load and capacity across all of your sites in one easy to understand view. See which sites are heavily loaded and which are underutilized. Radio and talkgroup affiliations help you understand how your users are distributed across your radio system while trend graphs help you distinguish between a momentary peak in demand or a growing concern.

DARK MODE

ASSESS SYSTEM PERFORMANCE

“ From the new radio activity report feature, I was able to see that some of our lost radios were affiliating. ”

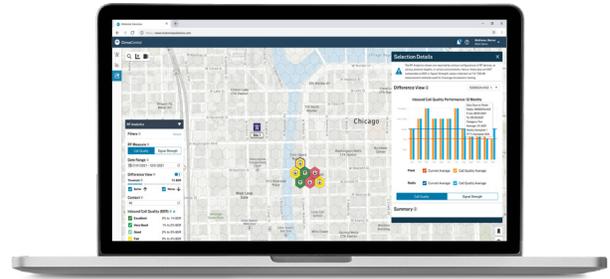

CALL MONITORING

See real-time call activity, trunking status, channel utilization and affiliations on your system. And with integrated channel faults, you can instantly be alerted to potential channel issues.

SIMPLIFIED REPORTING

Schedule reports to run automatically or pull them manually. From system utilization to cloned radios, a collection of available reports can provide insights into system performance.

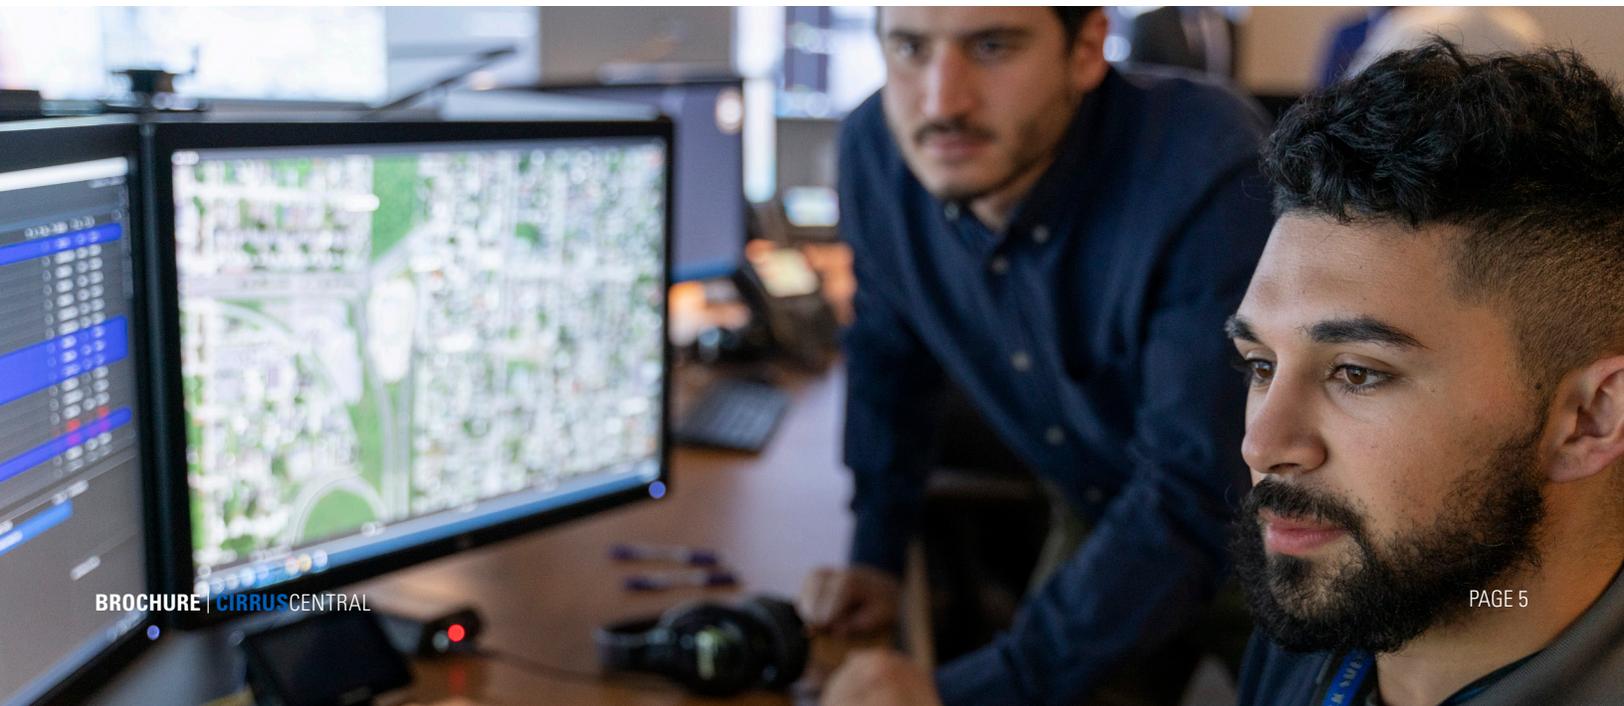

RF ANALYTICS

See your users' call experience. RF Analytics continuously plots call performance data on a map so you can see potential trouble areas and performance changes over time.

ANOMALY DETECTION

Be alerted to abnormal activity on your radio system. Anomaly Detection analyzes everyday patterns and recognizes unusual events and presents them for your investigation.

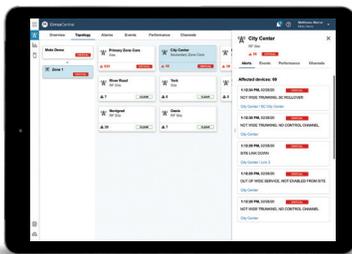

SIMPLE OPERATIONS

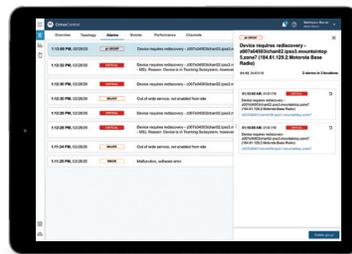

TROUBLESHOOTING HAS NEVER BEEN EASIER

Troubleshooting your system has never been easier with alarm aggregation and topology views. And as a cloud-based solution, CirrusCentral always runs with the most up-to-date, secure code.

SYSTEM TOPOLOGY

View your entire system hierarchy and quickly navigate up or down your system tree. Drill down into the details and get to the root cause in just a few clicks.

ALARM AGGREGATION

Reduce alarm flooding by grouping related items. Efficiently sort through alarms and events with predefined groups or your own customized groups.

“ The automatic alarm aggregations saves us a lot of time in the troubleshooting process ”

ALWAYS UP-TO-DATE

Get rapid feature delivery and access to the latest version of system management software, features and security simply by logging in. There is no software to download and install on your equipment.

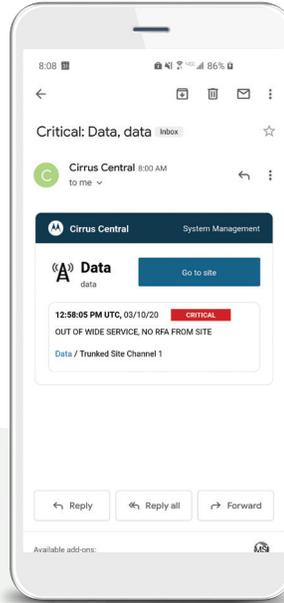

EASY ACCESS

ANYWHERE, ANY DEVICE EASIER

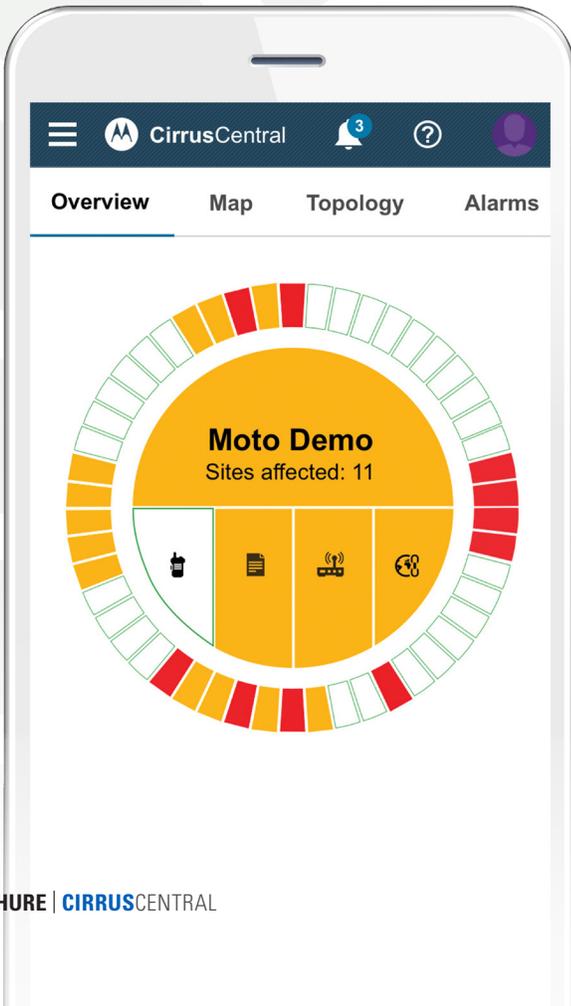

Securely access CirrusCentral Management with a standard web-browser.

“ We were monitoring the high traffic sites over New Year’s Eve holiday. It’s a great tool. Being able to get to it when we’re not in the office is critical for us. It has been great. ”

NOTIFICATIONS

Get immediate awareness of events and alarms over email or text message, right to your phone or tablet. Additionally, CirrusCentral specific notifications such as planned downtime or software release notes can easily be found within the portal at your convenience.

WEB-BASED ANYWHERE ACCESS

Securely log in from the office or away. Mobile-optimized page content automatically adjusts to fit your screen size.

SINGLE, SECURE SIGN-ON

Sign in once to access multiple system management applications.

Two-factor authentication via mobile, email or even a smartwatch protects against unauthorized access.

SCALABLE ACCESS

Don’t let license constraints get in the way. From just a handful to unlimited, you choose how many users need visibility and access.

BUILT-IN SECURITY

CirrusCentral is built with the security of your system and data in mind. Motorola Solutions employs a holistic risk management approach to cybersecurity - one that includes governance and oversight throughout the product development, implementation and operation support lifecycle.
